CERT-In Advisory CIAD-2025-0048

Reports of Apple Threat Notifications

Original Issue Date: December 05, 2025

Description

It is reported that Apple issued notifications to its users across the world including India about being targeted by mercenary spyware attacks who are trying to remotely compromise the iPhone associated with their Apple ID. The notification also recommends users to take additional safeguards to protect data on their device, such as updating their iPhone (latest version iOS 26.1) and any other Apple devices they use to the latest software version, update messaging and clouds app to the latest available version, and enabling Lockdown Mode.

Users are strongly advised to update their devices as advised by Apple. Users are also recommended to refer CERT-In Vulnerability Notes and Advisories and apply appropriate patches for their devices.

Any user who has received such notification and wish to get their apple devices examined/ benefit from the technical assistance are requested to kindly reach out to CERT-In via email: submitmobile@cert-in.org.in

Note: Do not make any changes to the phone (resetting, deleting applications, updating, restarting etc.) as these actions could tamper evidence.
